For European Jade/Venetian plaster

## VENETIAN PLASTER SERIES

OURSTUCCO's European jade comprehensively surpassed similar products in European and American countries. And the construction is simple and the effect is unique: the construction process is as follows:

1. Anthicine-resistant bottom paint rolls again
  2. Batch the first time of European color jade (base)
  3. Batch the second pass of European color jade (pattern shape)
  4. Batch European color jade for the third time (the pattern is shaped and gathered)
- Without waxing, you can get natural jade-like artistic effects.
